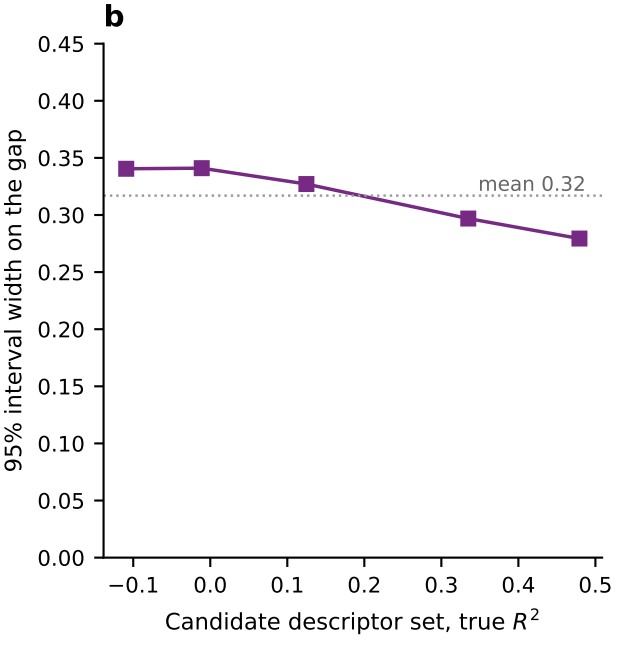
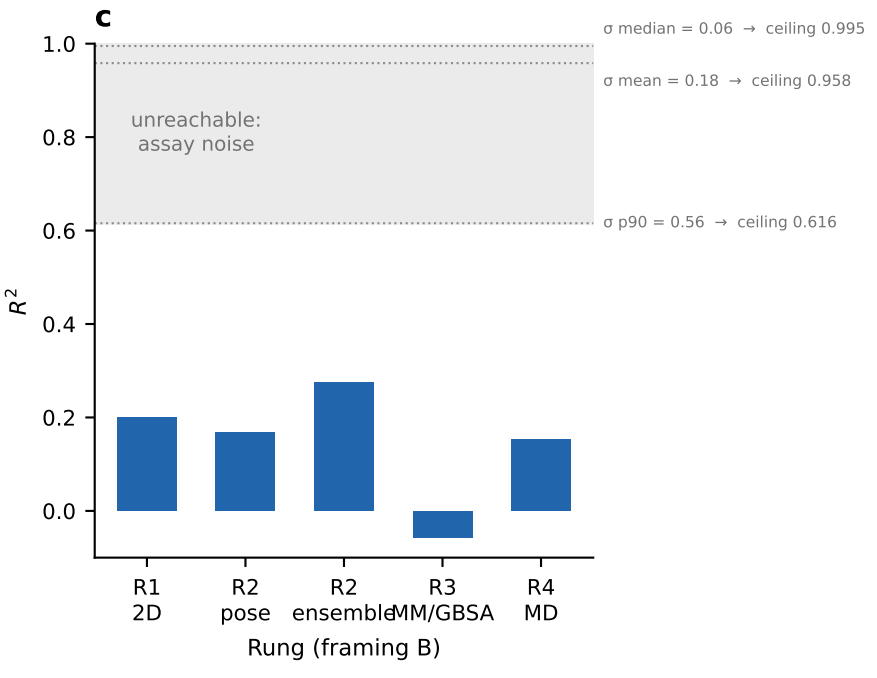
a
Power to call it better than rung 1 (%)
Candidate descriptor set, true R^2
rung 4 observed
rung 4 = 0.209
80% power
at $R^2 \approx 0.45$



b
95% interval width on the gap
Candidate descriptor set, true R^2
mean 0.32



c
R^2
σ median = 0.06 → ceiling 0.995
σ mean = 0.18 → ceiling 0.958
unreachable:
assay noise
σ p90 = 0.56 → ceiling 0.616
